PROJECTS

Quiz Master

Tech Stack: Python, Flask, MySQL, HTML, CSS, Bootstrap, Jinja2, Matplotlib.

- Developed a multi-user quiz web application with Admin and User roles. Admin manages users and quiz content, while users can register, attempt quizzes, and view scores. Implemented full CRUD functionality and integrated Matplotlib for performance visualization.

Group Expense Settlement System

Tech Stack: Java, Swing, OOP, DSA (HashMap, Priority Queue), Greedy Algorithm.

- Developed a Java Swing-based GUI expense splitter to manage and track group expenses, supporting equal and custom splits with validation, maintaining detailed transaction history, and computing minimized settlements among group members.

Digital Queue Management System

Tech Stack: Python, Flask, MySQL, HTML, CSS

- Built a web-based digital queue management system to reduce waiting time, allowing users to take online tokens, track their queue position, and receive real-time updates. The system includes a staff dashboard to manage tokens and display the current serving number in real time.
